ABSTRACT

Many farm and nonfarm workers require skills and knowledge of agriculture to perform their jobs. The 1970 Census of Population classified a sample of 20 percent of all persons by occupation and industry of primary employment. Those occupation-industry classifications which required competency in agriculture were identified. A compilation was made of the number of workers in each industry-occupation category by class of worker for each State. These data can be used to develop labor placement programs and assist educators to develop programs of instruction. Guidance counselors should be better able to help students with occupational information, while employment counselors can indicate potential opportunities. Planning agencies will be able to determine those industries most suitable for an area.

These data are presented in 11 volumes; one volume (ERS-570) contains summary data for all States while State data are in ten regional volumes. Each regional volume conforms to one of the ten Standard Federal Regions.

United States Summary	ERS-570
Region 1 - New England States	ERS-571
Region 2 - New York-New Jersey	ERS-572
Region 3 - Central Atlantic States (including Virginia)	ERS-573
Region 4 - Southeastern States	ERS-574
Region 5 - East North Central States	ERS-575
Region 6 - Arkansas, Louisiana, New Mexico, Oklahoma, and Texas	ERS-576
Region 7 - Iowa, Kansas, Missouri, and Nebraska	ERS-577
Region 8 - Colorado, Montana, North Dakota, South Dakota, Utah, and Wyoming	ERS-578
Region 9 - Arizona, California, Hawaii, and Nevada	ERS-579

PREFACE

This explanatory handbook -- and the accompanying manpower data on agribusiness occupations including occupations in both farm production and related off-farm industries -- is a culmination of 6 years of work by the National Committee on Employment Opportunities and Training Needs in Agribusiness. This handbook represents a pioneer effort to identify and define agribusiness occupations and the industries in which these occupations are located. The occupational categories and the data were taken from the 1970 census of population.

Many different concepts of the term "agribusiness" now prevail. To resolve some of the problems related to the use of various definitions, the Committee uses the concept of "occupational competency" in classifying the occupations as agribusiness.

The persistent efforts of a number of individuals have made possible this initial nationwide identification of agribusiness occupations. The current national interdepartmental committee is comprised of Melvin R. Janssen, N. P. Ralston, and Walter E. Sellers, Jr., of the U.S. Department of Agriculture; H. Neville Hunsicker (Chairman) and Philip R. Teske, of the Office of Education, U.S. Department of Health, Education, and Welfare; Kenneth R. Norell and Sheldon G. Ziman, of the Bureau of Census, U.S. Department of Commerce; and Maurice L. Hill, Willis F. Sloan (retired), Richard E. Dempsey, and David Evans of the U.S. Department of Labor. In addition, major consultants and members of work committees included: Glenn Z. Stevens, Pennsylvania State University; Conrad F. Fritsch, Texas A & M University; Glenn McNatt and Joe McCluskey (retired) of the Department of Labor; Robert B. Glasgow of the U.S. Department of Agriculture; and approximately 225 specialists who served on the reviewing teams from the participating States of Ohio, South Carolina, New York, California, Iowa, Texas, Oregon, Pennsylvania, and Minnesota.

Special recognition is due Mr. Sellers and Mr. Ziman, who did much of the work for the committee.

In the future, in addition to studying, classifying, and updating the information for accuracy and comprehensiveness, the National Committee expects to utilize the services of the U.S. Department of Labor in making future projections of employment opportunities. The Committee also will plan and coordinate the identification and qualification of essential competencies for entry and advancement in the major occupations, and will obtain commitments from established Federal and State data reporting services to regularly update employment data on agribusiness occupations in their systems.

The Committee requests that individuals, institutions, and agencies, in government and in the private sector, who find the information in this report useful assist with its further development and improvement. Users are urged to forward to the Committee any new occupations and new data which are revealed through their own studies. In this way, data on the breadth and composition of agribusiness occupations will continuously be updated.

H. N. Hunsicker, Chairman
National Committee on Employment Opportunities
and Training Needs in Agribusiness

EMPLOYMENT IN AGRICULTURAL AND AGRIBUSINESS OCCUPATIONS

INTRODUCTION

The size and composition of the Nation's large and complex agribusiness occupational sector recently has been ascertained. For many years, those conducting formal education and manpower training programs have needed to know more about the various occupational sectors of the Nation's economy -- particularly the agribusiness sector. There is a need to know the composition of this sector, its demographic makeup, future problems that can be expected, whether the sector is a contracting or expanding one, and what competencies are needed in various agribusiness occupations.

In the mid-1960's, leaders in the Federal Government, forseeing the need to know more about employment in agribusiness, appointed a National Committee on Employment Opportunities and Training Needs in Agribusiness. For several years, this interagency committee met, debated, and sought answers on how to comprehend the complex agribusiness sector. In 1972, the Committee formulated the National Agribusiness Manpower Project, a long-range three-phase program, and appointed a subcommittee to work on the first phase (this report). The subcommittee, comprised of specialists from several Federal and State agencies with background in agriculture, education, and labor determined the agribusiness occupations based on a predetermined set of concepts. According to these concepts, an occupation is considered an agribusiness occupation if it requires or utilizes skills in, or knowledge of: (1) agricultural production and propagation of animals (land and aquatic), animal products, plants (crops and ornamental), plant products, forests and forest products; (2) the provision of services associated with agricultural production and the manufacture and distribution of supplies used in agricultural production; (3) the designing, installation, repair, operation, and servicing of machinery, equipment, and power sources and the construction of structures and conveniences used in agricultural production; (4) the inspection, processing, and marketing of agricultural products and primary byproducts; (5) aspects of greenhouse, nursery, landscaping, and other ornamental horticultural operations; (6) the conservation, propagation, improvement, and utilization of renewable natural resources; (7) the multiple uses of forest lands and resources, and (8) other agribusiness competencies. 1/

Using this definition, the Committee examined over 90,000 industry-occupational cross-classifications (matrix cells) to identify the maximum number of agribusiness cells. After the compilation of occupations was made, project coordinators from selected States met with the National Committee and organized specialists in eight subsectors to complete the identification program.

1/ For a more detailed definition of agribusiness occupational competencies, see appendix A, U.S. Summary.

Specialists from nine States were asked to indicate the relevance of selected matrix cells in each of the above competency groups. The National Committee reviewed the specialists' proposals and made final determination on the cross-classifications to be used in the employment tables.

Employment data in this report are three-dimensional, showing not only occupation and industrial attachment, but also class of worker.

The basic goal of all phases of the National Agribusiness Manpower Project is to provide a system for securing information for national and state areas on current and projected manpower and training needs in occupations requiring or utilizing agribusiness competencies. Detailed objectives of the overall project are to:

1. Identify current agribusiness job opportunities for national and State areas;

2. Project agribusiness job opportunities for national and State areas;

3. Identify skills, competencies, and training needed for current and future employment in agribusiness occupations;

4. Integrate agribusiness data into manpower information programs which will provide for periodic updating of these data;

5. Provide employment information to assist in:

   A. Developing educational and training programs with appropriate curricula relevant to the needs of agribusiness occupations;

   B. Counseling and placement of individuals in agribusiness jobs;

   C. Administrative decisionmaking, budgeting, and program planning;

   D. Community development planning related to manpower needs and resources; and

6. Provide trade associations, nongovernment organizations, and private industries with more accurate data concerning employment and training needs in agribusiness occupations.

THE NATIONAL AGRIBUSINESS MANPOWER PROJECT

Many changes have occurred in the past 20 years in the technology, organization, and management of agriculturally related industries. In addition to the new businesses created by the changes in operation, one of the most important effects of change has been in occupations serving these industries. These changes have been so rapid that occupational reference materials used by general education, vocational education, and other training authorities, including guidance and counseling personnel, do not always reflect current needs.

The effort to assess available information for occupational reference led the National Committee to the development of a plan of action in three phases:

Phase I

This phase -- the one reported on in this handbook -- involved the identification of occupations requiring or utilizing agribusiness competencies, and the extraction of corresponding manpower data from the 1970 decennial census tabulations. The use of the "agribusiness competency" criteria involved the development of common denominators for resolution of differences in definitions in use by agencies of the U.S. Departments of Agriculture; Health, Education, and Welfare; and Labor. These data provide a benchmark for education, training, and job placement authorities to coordinate preparation of information for curriculum development, guidance, job placement, and planning for community development.

Phase II

The objective of Phase II is to make projections of employment opportunities and training needs in occupations requiring agribusiness competencies. This phase will be coordinated with the U.S. Department of Labor manpower data system.

Phase III

This phase will involve the development of methods for integrating the agribusiness manpower data into existing systems of data collection and analysis to keep information current. Researchers and others (including trade associations) are encouraged to make special studies of new occupations in various industries and to inform the National Committee of results.

RELATIONSHIP OF THE NATIONAL AGRIBUSINESS MANPOWER PROJECT TO THE NATIONAL-STATE INDUSTRY-OCCUPATION MATRIX SYSTEM

Within the U.S. Department of Labor, the Bureau of Labor Statistics (BLS), in cooperation with the Manpower Administration (MA) and the State Employment Security agencies, is developing an integrated national-State industry-occupation employment matrix system, which will be completed by mid-1974. This system contains a series of 51 State matrices, including one for the District of Columbia, consistent in format, content, coding structure, and employment concepts. Each State matrix will cover employment in 441 occupational categories cross-classified by 201 industrial sectors. In addition, the system is designed to provide a flexible multipurpose computer system to utilize the State matrices for a variety of operational and research programs.

The national-State matrix system is designed to provide data and operational techniques for a variety of potential users including the National Committee. Many of the objectives of the National Agribusiness Manpower Project interface with the capabilities of the national-State matrix system. For example, the system could be used by those interested in agribusiness occupations to:

(1) Provide projections. Provide national, State, and some sub-State manpower projections of the employment opportunities in occupations requiring agribusiness competencies. A byproduct will be its provision of projections of national and State industrial employment growth, which can be then used to plan area economic development.

(2) Update projections. The State matrices and projections may be updated periodically by the State employment agency.

(3) Assess education and training needed. In cooperation with the individual State agencies, the program will help to assess the education and training needed to meet the projected manpower needs. BLS has also related its occupational categories to the instructional programs of the U.S. Office of Education.

The responsibilities for the Department of Labor industry-occupation matrix program are divided among the Bureau of Labor Statistics, the Manpower Administration, and the State Employment Security agencies as follows: In general, BLS has primary responsibility for the technical development and statistical adequacy of the Department of Labor matrix system. The tabulution, estimation, analysis, and publication of the national data is the responsibility of BLS. The Manpower Administration has primary responsibility for the coordination of the program, and for providing guidance and assistance to the States in the use of and application of the manpower projections for manpower program planning and employment service operations. The cooperating State Employment Security agencies are responsible for the operation of the program at State levels under the technical guidance of BLS. In addition, the State agencies are responsible for utilizing the techniques and disseminating any resulting estimates to State and local users.

Inquiries about State and local manpower needs should be directed to the research and analysis division of the State Employment Security agencies. Inquiries about national use and future concerns in agribusiness occupations should be directed to the National Committee on Employment Opportunities and Training Needs in Agribusiness. 2/

USES OF AGRIBUSINESS EMPLOYMENT DATA

As stated earlier, little is known about the detailed structure of occupations and industries requiring agribusiness knowledge and competencies. Thus manpower analysts, placement specialists, guidance counselors, vocational educators and State and local planners have not had adequate information to plan and to develop sound programs. The data in this report can be used to resolve the problems as follows:

1. Knowledge of the relationships of industries and occupations will give State employment security workers basic information for developing their labor placement programs. It will be especially useful to

---

2/ H. N. Hunsicker, Educational Program Specialist, U.S. Department of HEW, 7th and D Streets, S.W., Room 5120, Washington, D.C. 20202.

identify current national and State agribusiness manpower needs by occupation and industry -- information that has been unavailable. Then data can be adapted to labor market areas.

2. The Vocational Education Act of 1963 requires that training programs be in response to demonstrated needs. The present data will permit State and local officials to develop vocational educational programs suited to needs of the area. The information from the project will also assist educators to develop programs of instruction and curriculum materials tailored to the specific needs of students.

3. Educational guidance counselors will be able to give better curriculum and instructional guidance to students when they know the opportunities in various occupations. Students can also avail themselves of better curricula and course offerings to prepare for potential jobs. Employment counselors will have greater knowledge of employment opportunties for those who have been trained.

4. State, multicounty, and local planning agencies will find the labor force composition and labor force needs useful in planning for economic development. They will be able to determine the industries most suitable for expansion in relation to the labor force, community services and other resources.

Any of the above activities can be conducted independently of the remainder. Yet, coordination and integration of all uses will result in greater effectiveness of all programs involved.

SOURCE AND COMPARABILITY OF AGRIBUSINESS EMPLOYMENT DATA

Source of Data

Data in this report are derived from the 1970 Census of Population taken by the U.S. Bureau of the Census. Twenty percent of the population were asked questions about their employment. Occupation, industry, and class of worker data were obtained from answers to items 33 to 35 on the 1970 Census of Population questionnaire (see job activity questions below). This series of questions was used to obtain information for the employed, the experienced unemployed, and experienced workers not in the labor force during the reference week. The last two categories apply to persons who had worked at some time during the previous 10 years. All three items relate to one specific job held by the person. For an employed person, the information refers to the job held during the reference week. If he was employed at two or more jobs, the job at which he worked the greatest number of hours during the reference week was to be reported. For experienced unemployed persons and for those not in the labor force, the information refers to the last job the persons held. From these data, the Committee derived the data published in this report -- data which indicate the current manpower situation in agribusiness occupations.

The following are the job activity questions on the 1970 Census of Population questionnaire:

33-35. Current or most recent job activity

Describe clearly this person's chief job activity or business last week, if any. If he had more than one job, describe the one at which he worked the most hours.

If this person had no job or business last week, give information for last job or business since 1960.

33. Industry

a. For whom did he work? (If now on active duty in the Armed Forces, print "AF" and skip to question 37).

- -

(Name of company, business, organization, or other employer)

---

b. What kind of business or industry was this? (Describe activity at location where employed).

- -

(For example: Junior high school, retail supermarket, dairy farm, TV and radio service, auto assembly plant, road construction)

c. Is this mainly: (Fill one circle)

0 Manufacturing

0 Wholesale trade

0 Retail trade

0 Other (agriculture, construction, service, government, etc.)

---

34. Occupation

a. What kind of work was he doing?

- -

(For example: TV repairman, sewing machine operator, spray painter, civil engineer, farm operator, farm hand, junior high English teacher)

---

b. What were his most important activities or duties?

- -

(For example: Types, keeps account books, files, sells cars, operates printing press, cleans buildings, finishes concrete)

---

c. What was his job title?

- -

35. Was this person -- (Fill one circle)

Employee of private company, business, or individual for wages, salary, or commissions 0

Federal government employee 0

State government employee (city, county, etc.) 0

Self-employed in own business, professional practice, or farm 0

Own business not incorporated 0

Own business incorporated 0

Working without pay in family business or farm 0

The Manpower Administration acquired the employment data from the Census Bureau for BLS, who reformatted the data for their national-state matrix system. In turn, the National Committee on Employment Opportunities and Training Needs in Agribusiness transposed the data to its own tapes. In the process, computer programming techniques were designed to provide a tested model so that any subsector matrix on employment may be derived from the tabulations at a reasonable cost. Persons interested in the detailed technical aspects of the agribusiness computer program should address their questions to Walter E. Sellers, Jr., Economic Research Service, U.S. Department of Agriculture, Washington, D.C. 20250.

Each industry and occupation listed in the employment tables has a three-digit census code and may contain from one to several hundred detailed industries or occupations. For a listing of the detailed occupations and industries, see appendixes B and C, respectively United States volume. 3/

Comparability and Limitations of Data

The numbers of workers given in the tables in this report are census of population figures based on the chief activity or primary occupation the respondent was engaged in during the survey week. The number of persons reporting in some on-farm occupations is considerably different than the number published in the 1969 Census of Agriculture. This census reported 2.7 million farm operators, of which over a million worked 100 or more days off the farm. Thus, in the 1970 Census of Population, most of the 1 million primarily off-farm workers reported their occupations as other than farm operators.

Factors such as the survey week also affect the number of persons reporting their occupations. For instance, the 1970 decennial census reference week was during March, when activity on many farms and in farm-related industries in the Northern States was dormant or slow. During 1970, 69 percent of the

---

3/ Additional information on the census occupation and industry classification system is presented in the 1970 Census of Population Classified Index of Industries and Occupations.

hired farmworkers were employed on farms for less than 75 days. 4/ Obviously, most of these were not working on farms in March. Thus, the number of persons reporting themselves as farmers or farmworkers in the 1970 decennial census was fewer in comparison with what would have been reported during May through September. Most persons doing farm wage work during March are most likely engaged full time in that work.

In the 1970 Census of Population, the industry categories are defined in terms similar to those used in the 1967 Standard Industrial Classification (SIC). The SIC, developed under the sponsorship of the U.S. Office of Management and Budget, is designed for the classification of establishments by primary type of industrial activity in which they are engaged. One of the major purposes of the SIC is to promote uniformity and comparability in the presentation of statistical data collected by various agencies.

EXPLANATION OF SECTIONS I, II, AND III OF THE AGRIBUSINESS EMPLOYMENT TABLES

Occupation and Industrial Attachment

Occupational data presented in the employment tables in this report are separated into three sections based on the prevalence of workers within specific occupations and industries that require or utilize agribusiness occupational competencies. These competencies are a modification of the definitional concepts and logic outlined in Subject Matter Area 01 of Standard Terminology For Curriculum and Instruction in Local and State School Systems, Office of Education, U.S. Department of Health, Education and Welfare Handbook VI OE-23052. (Also refer to Appendix A United States volume).

In Section 1, for 18 selected occupations, all of the 2,996,998 workers in all industries "where employed" require or use agribusiness competencies. (e.g. all veterinarians).

In Section 2, for 54 selected occupations, all of the 663,541 workers in some industries (only those listed) require or use agribusiness competencies. (Eg. all architects - landscape architects - in horticultural services).

In Section 3, for 67 selected occupations, some of the 4.4 million workers in some industries (only those listed) require or use agribusiness competencies. (Eg. some chemists - agricultural chemists - in the chemical industry).

All manpower data tabulated in Sections 1 and 2, but only some in Section 3, require or use agribusiness competencies. (See title page of each section for explanation of contents).

The agribusiness employment tables are a subsector of the BLS matrix and consist of 108 occupations and 201 industries. The occupations of Section I

4/ Hired Farm Working Force, 1970, Agr. Econ. Rpt. No. 201, Economic Research Service, U.S. Dept. of Agriculture.

may exist within any one of these 201 industries. Sections 2 and 3 have a maximum of 82 selected industries in which each selected occupation may be found.

Because census data are not available in more detailed occupation-industry classifications, the National Committee was unable to ascertain what proportion of the 4.4 million workers in Section 3 required or utilized agribusiness competencies. It is left up to the State or local agencies to determine these percentages through further research. Whenever these studies are made, it is requested that they forward their findings to the National Committee.

Class of Worker

In addition to industry and occupation attachment, employment is shown in each section by class of worker. The class of worker criteria consists of four major categories: (1) private; (2) government; (3) self-employed, and (4) unpaid family workers. Each category is delineated as follows:

1. Private wage and salary workers -- Persons who worked for a private employer for wages, salary, commission, tips, pay-in-kind or pay at piece rates.

2. Government workers -- Persons who worked for any government unit, regardless of the activity of the particular agency. This category is subdivided by the level of government: (a) Federal, (b) State, (c) local (county, city, village, township, etc.).

3. Self-employed workers

   a. Own business not incorporated -- Persons who worked for profit or fees in their own unincorporated business, profession, or trade, or who operated a farm. Included here are the owner-operators of large stores and manufacturing establishments as well as small merchants, independent craftsmen and professional men, farmers, peddlers, and other persons who conducted enterprises on their own.

   b. Own business incorporated -- Persons who consider themselves self-employed but work for corporations. (In most cases the respondents will own or be part of a group that owns controlling interest in the corporation.) Since all workers of a corporation are defined as wage and salary workers, this category is tabulated with "private wage and salary workers."

4. Unpaid family workers -- Persons who worked without pay on a farm or in a business operated by a person to whom they are related by blood or marriage. These are usually the children or the wife of the owner of a business or farm.

Employment Table Section I

Occupations That Require or Utilize Agribusiness Competencies

In Any Industry Where Hired

The 18 occupations selected for section I are positions that require or utilize agribusiness competencies in any industry in which it exists. For example, gardeners and groundskeepers are employed in 195 industries. Whether the occupation exists in horticultural services or motor vehicle equipment manufacturing, all gardeners and groundskeepers by definition require or utilize agribusiness competencies.

SECTION 1.--OCCUPATIONS THAT REQUIRE OR UTILIZE AGRIBUSINESS COMPETENCIES IN ANY INDUSTRY WHERE HIRED*, ALASKA

Employment Table Section II

Occupations That Require or Utilize Agribusiness Competencies

Only in Selected Industries

This section consists of 54 occupations within 82 selected industries. The criteria for inclusion in section II is that the occupations require or utilize agribusiness competencies in those selected industries where they exist. For example, architects in horticultural services, (landscape architects) require or utilize agribusiness competencies while in other industries architects most likely do not require or utilize such competencies. Occupations in section II may also appear in section III, but not in the same industry and never in section I.

Employment Table Section III

Occupations Within Selected Industries Where Some Workers

Require, or Utilize Agribusiness Competencies

This section consists of 67 occupations within 82 selected industries. The major difference from section II is that not all persons employed in the occupations in section III require or utilize agribusiness competencies. For example, some economists in universities require or utilize agribusiness competency (such as agricultural economist) while other economists in the same industry do not use, or require, such competencies.
